Junior Software Engineer with Bachelor's degree in Information Technology and experience in mobile development, web development and QA engineer. Have experience directly Contributed to a real international client project as a QA engineer and mobile developer during an internship at a multinational company in Malaysia, Technology enthusiast with a strong passion for exploring emerging tech trends and applying artificial intelligence to build smarter, more efficient software solutions.

EDUCATION LEVEL

Asia e University, Malaysia ***Sep 2022 - Oct 2026***
Bachelor of Information and Communication Technology with Honours - CGPA 3.70/4.00
CEP-CCIT Faculty of Engineering, Universitas Indonesia ***Sep 2022 - Nov 2024***
Software Engineering - TI Diploma – CGPA 3.31/4.00

WORK EXPERIENCE

Develab Sdn. Bhd. Kuala Lumpur, Malaysia ***Apr - Oct 2026***
Internship - Software Engineer, Technology Division

- Developed the frontend of an AI-based mobile scheduling app for 1 Vietnamese client using the Flutter framework. The app helps users plan and organize their schedules with the assistance of an AI.
- Performed end-to-end QA on app features, identifying and reporting bugs, verifying fixes, and holding regular review meetings with the team to confirm the app passed every testing stage before deployment.
- Built a Langflow AI agent as the in-app scheduling assistant, turning user conversations into smart, personalized schedules.
- Developed an automated testing system with Selenium that executes test scenarios defined in Excel, replacing repetitive manual testing with consistent, repeatable test runs.

PT Linknet Tbk Jakarta, Indonesia ***Jun - Sep 2024***
Internship – Machine Learning Engineer, Business Analyst Division

- Collected and prepared customer tweet data, trained an ML model, and deployed it as an auto-reply system for PT Linknet Tbk X (Twitter) account, automatically detecting and responding to customer tweets and mentions, replacing manual monitoring and saving team time and effort.
- Designed a movie app UI/UX in Figma and proposed it to First Media.

CERTIFICATIONS

NIIT National Institute of Information Technology ***Oct 2024***
Software Engineer Certifiate
CCIT of Faculty Engineering, Universitas Indonesia ***Oct 2024***
Technology Information Certifiate

PROJECT EXPERIENCE

Mobile App

- Developed and contributed to the frontend of an AI-based scheduling app used Flutter during internship, helping deliver an intuitive interface for AI-assisted scheduling.

Automation/AI

- Developed an automated testing system with Selenium that reads test scenarios from Excel and executes them automatically, replacing repetitive manual testing with fast, consistent test runs.
- Developed Chatbot Whatsapp used N8N
- Built a Python ML model that automatically replies to customer mentions on PT Linknet Tbk's X account.

Testing/QA

- Performed manual testing on a mobile app project at Develab Sdn. Bhd as a Junior QA Engineer, reporting bugs and coordinating with the supervisor and mobile developers to resolve issues.
- Designed a JUnit testing framework for Java.
- Analyzed and reported enhanced code coverage results for each JUnit test case within a test suite.

Website

- Developed a responsive, animated personal portfolio website using React JS to showcase projects and skills with a modern, engaging user experience across all devices.
- Built a full-stack food ordering web application with Laravel and a SQL database for a restaurant in Indonesia, as a final-year capstone project.
- Developed a clothing store e-commerce website using HTML, CSS, and JavaScript with MySQL (XAMPP).

UI/UX

- Developed a coffee shop application design using Figma (coursework).
- Designed the UI for a movie application using Figma (internship).

Database

- Developed database of minimarket with SQL Server Management Studio

ORGANIZATION EXPERIENCE

Universitas Indonesia - Depok, Indonesia ***Aug - Sep 2023***

Mentor - Inductions Days CCIT FTUI

- Facilitated group orientation sessions to foster connections among new students.
- Mentored new students and addressed their questions and concerns.

CCIT Faculty of Engineering, Universitas Indonesia - Depok, Indonesia

Marketing - CCIT Squad ***Sep 2022 - Sep 2023***

- Introduced and learned about the marketing of an institution to the general public.
- Built teamwork and communication skills to achieve organizational goals.

Universitas Indonesia - Depok, Indonesia

Event - Convocation CCIT FTUI ***Apr 2023***

- Managed on-site event operations
- Supported planning and coordination of graduation events
- Handled student registration and administrative tasks for the graduation ceremony.

HARD SKILLS

- Language & Framework : Laravel, Flutter, ReactJS, Python
- Backend & Database : REST API, MySQL, Firebase
- AI & Automation : AI-Assisted Development, Langflow (AI Agent), Selenium, N8N
- DevOps & Tools : Docker, Vercel, Github, Laragon
- Design & Productivity : Figma, Canva, Microsoft Office

LANGUAGE

- Indonesia (Native)
- English (CEFR: B2 Upper-Intermediate; Linguaskill: 161/180)
- Malaysia (Professional Working Proficiency)
